Now into its third year, we are delighted to announce the dates of the 2015 HyCoSy training courses. Previously held at Leigh Infirmary, we will have relocated to new purpose built accommodation on the Wrightington Hospital site.

12th/13th May 2015
13th/14th October 2015

Under the leadership of Phil Harris, Consultant Obstetrician & Gynaecologist, the unit has over 18 years experience in using Hysterosalpingo-Contrast Sonography as its first line tubal patency test.

The two day course is suitable for gynaecologists, radiologists, nurses and ultrasonographers wishing to learn the HyCoSy technique. It is particularly suitable and beneficial to have transvaginal scanning experience.

During the morning sessions, the programme will be made up of a series of seminars, including demonstrations of cervical catheterisation, discussion on aspects of subfertility management, as well as providing essential information on how to develop and launch your own HyCoSy service. The afternoon sessions provide valuable hands-on teaching of HyCoSy tubal patency testing.

Course fee: £650 (includes lunch and refreshments, but not overnight accommodation) – spaces are limited due to the hands on nature of the course, so book early to avoid disappointment.
