Lower Limb Pathway (Community Nursing)

RED FLAG ASSESSMENT

Immediately escalate to the relevant clinical specialist, those with the following 'red flag' symptoms/conditions. Provide appropriate wound care.

- Acute infection/ Symptoms of sepsis
- Acute Heart Failure
- Acute/suspected chronic limb threatening ischemia
- Suspected acute deep vein thrombosis (DVT)
- Suspected skin cancer
- Bleeding varicose veins

Patient requiring lower limb care with no red flags

Schedule & complete lower limb assessment within 2 weeks of identification ABPI result is a guide and forms only one part of the assessment, if the assessment does not correspond with the result, refer and discuss with TVN

ABPI < 0.5 Urgent referral to Vascular

ABPI 0.5-0.8 Apply reduced compression Refer to TVN

ABPI 0.8-1.3 Apply full compression

ABPI >1.3 / Unable to occlude Refer to TVN

Implement appropriate wound care Evaluate as per Wound Care Pathway

Compression Managed Leg Ulceration Guide

- Compression managed lower limbs should be immersed in a lined bucket of warm water with oilatum bath additive (minimum once weekly)
- Emollients should be applied at each dressing change in downward motion to hydrate skin
