### **Data Warehouse**

Our existing NHS clients must share a basic level of data with their main ICS (Integrated Care System). They have chosen a Federated Model over a single centralised data repository in a regional external HIE solution, due to the sensitivity of some patient data. In this model, they

**maintain their own local FHIR-based data repository on-premises and provide a reference to the file to the regional HIE.**

- 1. There are three main architecture patterns for delivering a Shared Care Record to share data with the ICS. Please identify the Trust's chosen option:**
  - a. Centralised Model – Data is stored in a centralised, consolidated data repository. Data shared by HIE participants is normalised, housed in, and accessed from a central data repository.
- 2. Does the Trust currently have a data repository for the above requirement if selecting b or c?**

N/A.
- 3. If yes, is it FHIR-based?**

N/A.
- 4. What is the name of the product?**

Snowflake.
- 5. Who is the supplier?**

Snowflake.
- 6. When is the contract renewal date?**

29/07/2024.
- 7. Is the Trust looking to purchase a data repository?**

No.
- 8. If yes, when does it plan to purchase it?**

N/A.
- 9. Who is responsible for sourcing the data repository? (Please provide name, email, and phone number if possible.)**

N/A.
