Introduction

When you have a visual impairment, it is important that you maximise your vision as much as possible.

Having the correct lighting can make a significant difference to what you are able to see.

We recommend task lighting, which is a flexible tabletop light that can be positioned over the activities you are doing.

These activities may include:

- Reading
- Writing
- Making a drink
- Preparing food
- Eating a meal
- Craft work, knitting, sewing etc

There are many good lighting options available so you may wish to shop around.

We recommend that the light is:

- flexible
- table level (to sit on a table)
- with white daylight, or a good quality LED

These are some places you may want to look to help you get started:

RNIB Shop

Website: www.rnib.org

Tel: 0303 1239999

Optima Low Vision Services LTD

Tel: 01803 864218
